

SIMPLY BETTER DRILLING

The latest programme of BDS Maschinen GmbH.
Magnetic core drilling machines, Annular cutters and Accessories.

Product Overview 2017

BDS magnetic core drilling machines

Four performance categories in the range.

Heavy duty magnetic drilling + tapping + countersink + reaming machine. Equipped with oil bath gearbox, full wave control electronics, KEYLESS drill chuck, reversible motor, variable speed & torque controls, intelligent sensors & indicators, etc. With a range of 7 different models to suit your requirements.

Heavy duty magnetic drilling machine. Equipped with intelligent sensors and indicators. With a range of 4 different models to suite your requirements.

High performance - low price. The economic magnetic drilling machines. Now equipped with attached cooling tank and bigger stronger carry case. With a range of 4 different models to suite your requirements.

Special purpose drilling machines. Consisting of rail drilling machines, compact magnetic drilling machine, Automatic magnetic drilling machine, Cordless magnetic drilling machine, Pneumatic magnetic drilling machine, etc.

Magnetic core drilling machines from BDS are convincing because of their performance, their features and their safety.

Timely wear warning!

The machines of the Profi-PLUS class are provided with an indicator to visualise & control the wear of the carbon brushes. By replacing the worn carbon brushes in time, you will protect the motor of your machine from damage.

High power for a low rotation speed!

Full wave control electronics enable the motor performance to constantly adapt to the load when drilling.

This feature enables the machine to deliver of high power with a low rotation speed and a steady operating sequence.

If the peak load is too high, the electronic torque shutdown will activate and prevent the tool from breaking.

For a long service life!

One of the most important and differentiating feature of a BDS magnetic core drilling machine is its gear-box. The BDS machines have multi-stage oil gearbox. An oil gearbox helps in providing lubrication to all the gears uniformly, therefore making the BDS machines more robust and reliable for longer service time.

Covered for more safety!

BDS Magnetic Core Drilling Machines are safe to handle. Due to internal cabling, cables are protected against being torn-off.

Easy to adjust with precision!

You can recognize machines with Swivel Base by this label.

The Swivel Base is an adjustment mechanism on the BDS magnetic core drilling machines to position the machine even under the magnetic condition. To use it: Bring the machine roughly into position, activate the magnet, disable the Swivel Base locking mechanism and now adjust the machine exactly. A relief, especially for overhead or horizontal work.

No more running dry or overheating.

Thanks to the tool's automatic internal lubrication, the cutting oil is always applied where it is needed. This principle ensures an exact amount and even distribution over the entire cutting area.

The drill doesn't run dry or overheat, and there's no unnecessary use of coolant. This significantly improves tool life and work results.

Magnet adhesion indicator!

The load configuration and the reserves of the electro-magnet are exactly adapted for the performance of the respective magnetic core drilling machine. The user is informed by an indicator if the magnet is completely clamped or not on the material. LED green: The magnetic adhesion meets the minimum requirements.

LED red: The magnetic adhesion is not sufficient, because it is reduced due to low material thickness or a coat of lacquer, forge scale or zinc.

BDS Magnetic Core Drilling Machines

Magnetic core drilling machines of the ProfiPLUS series are characterized by the universal range of applications in machinery and plant engineering. As an all-rounder, this series offers the following features:

- Full wave control electronics
- Forward and Reverse operation (CW / CCW)
- Multi-stage gear oil bath gearbox
- Reversible motor
- torque control
- KEYLESS quick-change drill chuck system, and many more. All the magnetic core drilling machines of this category have in common a high degree of flexibility when drilling, reaming, countersinking and thread cutting.

MAB 485

Core drill:

ø 40 mm
L 30 mm
L 55 mm

Twist drilling:

ø 18 mm
Reaming:
ø 18 mm

Countersinking:

ø 40 mm
Thread cutting:
M16

Motor output:	1150 Watt
Voltage:	230 V AC, 50-60 Hz
Stroke:	160 mm
Magnet size:	84 x 168 x 41,5 mm
Weight:	13 kg

Quick change drill chuck system: KEYLESS, 19 mm ($\frac{3}{4}$ ")	
Morse taper:	MT 2
Speed range 1:	50 – 250 min ⁻¹
Speed range 2:	100 – 450 min ⁻¹
Permanent internal lubrication:	•
Full wave control electronics:	•
Magnet indicator:	•
Overheating protection:	•
CW/CCW rotation:	•
Carbon brush wear control:	•

MAB 485 230 V

MAB 485 SB 230 V

MAB 485 SB 110/125 V

Clamping devices

Processing channelled and gusset plates.

Use the vacuum clamping device ZAV 300 with a high-performance pump for these materials.

Vacuum clamping device

ZAV 300 – suitable for channelled or gusset plates, non-ferrous metals and stainless steel.

Vacuum clamping device

ZAV 400 – suitable for smooth surfaces, non-ferrous metals and stainless steel.

Tube clamping device

ZRO 250 – for tube ø 80 – 250 mm,
for MAB 455, MAB 485, MAB 525, MABasic 450
ZRO 500 – for tube ø 150 bis 500 mm,
for MAB 825, MAB 845, MABasic 850

MAB 525

Core drill:
 ø: 50 mm
 L: 30 mm
 L: 55 mm
 L: 75 mm

Twist drilling:
 ø: 20 mm
Reaming:
 ø: 20 mm

Countersinking:
 ø: 50 mm
Thread cutting:
 ø: M20

Motor output:	1600 Watt
Voltage:	230 V AC, 50-60 Hz
Stroke:	160 mm
Magnet size:	90 x 180 x 48 mm
Weight:	16 kg

Quick change drill chuck system: KEYLESS, 19 mm ($\frac{3}{4}$ ")	
Morse taper:	MT 3
Speed range 1:	70 – 280 min ⁻¹
Speed range 2:	180 – 580 min ⁻¹
Permanent internal lubrication:	•
Torque control:	•
Full wave control electronics:	•
Magnet indicator:	•
Overheating protection:	•
CW/CCW rotation:	•
Carbon brush wear control:	•

MAB 525 230 V

MAB 525 110/125 V

MAB 525 SB

Core drill:
 ø: 50 mm
 L: 30 mm
 L: 55 mm
 L: 75 mm

Twist drilling:
 ø: 20 mm
Reaming:
 ø: 20 mm

Countersinking:
 ø: 50 mm
Thread cutting:
 ø: M20

Motor output:	1600 Watt
Voltage:	230 V AC, 50-60 Hz
Stroke:	160 mm
Magnet size:	90 x 180 x 48 mm
Weight:	16 kg

Quick change drill chuck system: KEYLESS, 19 mm ($\frac{3}{4}$ ")

MAB 1300 230 V

MAB 1300 110/125 V

Retooling made easy.

Magnetic core drilling with large calibres.

Up to 130 mm in diameter and up to 110 mm cutting depth.

Drilling with a twist drill of up to ø 45 mm.

A flexible choice of tools. Maximum stroke without steady: 310 mm

Scope of delivery MAB 825, MAB 845 and MAB 845 SB:

1 Magnetic core drilling machine · 1 Quick change drill chuck system KEYLESS, 19 mm Weldon ($\frac{3}{4}$ ") · 1 Industrial arbor MT3, 32 mm Weldon ($1\frac{1}{4}$ ") · 1 Ejector ZAK 075, 090, 100, 120 · 1 Carry case on wheels
1 Safety chain · 1 Offset screwdriver SW 6 · 1 Drill drift MT 3
1 Operating manual

Scope of delivery MAB 1300:

1 Magnetic core drilling machine · 1 Carry case on wheels · 1 Safety chain · 1 Offset screwdriver SW 4, 6, 8
1 Ejector ZAK 075, 090, 100, 120 · 1 Drill drift MT 4 · 1 Bushing ZAP 200 from Weldon 32 mm to 19 mm · 1 Operating manual

BDS Special Purpose Drilling Machines

Special magnetic core drilling machines assist with specific tasks:

- Use in very tight drilling situations
- Drill with compressed air
- Drill rail profiles with electricity or gas drive

Do you have specific requirements? BDS also delivers special out-of-series solutions.

BDS rail core drilling machines

RailMAB 965 with petrol engine

RailMAB 925 with electric motor and

RailMAB 960 with HONDA petrol engine –

Both systems are easily fixed to the rails with a rapid clamping system. The multitude of optionally available drill adapters greatly increases the flexibility and the ease of use of the two core drilling machines. The track construction machine range is topped off with the BDS special drills of the carbide RAIL series, which have a cutting depth of 30 mm and a diameter of 16 mm to 36 mm. The drill on both machines is lubricated and cooled through an external attachable high-pressure storage tank. Use the cooling lubricant concentrate BDS 6000 to cool and lubricate the machine.

RailMAB 925

Core drill: Carbide RAIL

ø: 36 mm

L: 30 mm

L: 55 mm

Motor output: 1600 Watt

Voltage: 230 V AC, 50-60 Hz

Stroke: 160 mm

Weight: 17 kg

Quick change drill chuck system: KEYLESS, 19 mm ($\frac{3}{4}$ ")

Morse taper: MT 3

Speed range 1: 70 – 280 min⁻¹

Speed range 2: 180 – 580 min⁻¹

Permanent internal lubrication: ●

Cooling: With drilling emulsion

Original BDS accessories makes work easier. BDS PowerWORKER, PowerCLEANER and the StarterKITS.

PowerCLEANER

PowerCLEANER

ORDER NO.

POW 200

PowerCLEANER – An ideal two in one tool for removing the metal chips from the core drills with the special hook and then cleaning the chips from workplace with the special brush.

Remove sharp-edged metal chips

Clean the work surface

The PowerCLEANER and PowerWORKER StarterKITS: High-quality necessary equipment at an attractive price!

Start with the right basic equipment for each magnetic core drilling machine. In one package at a very favourable price.

- ▶ 5 core drills, short, of the most common diameters: 14, 18 and 22 mm.
- ▶ 1 liter of High-performance cutting oil BDS 5000
- ▶ and one BDS PowerWORKER or one BDS PowerCLEANER.

Magnetise, collect together...

Demagnetise and finished!

The BDS PowerWORKER cleans up all magnetic drilling chips. With the help of this practical tool and its powerful magnetic force, chips are collected with ease and then placed quickly and easily in the scrap container. Magnetise, collect together, strip off and finished.

Quick-change drill chuck and inserts for threads from M 6 to M 42

Magnetic core drilling machines of the ProfiPLUS class are ideally suited for thread cutting.

Basic requirements are: CW/CCW operation, full wave control electronics and high motor performance.

Quick-change drill chuck size MK 2, MK 3 and MK 4

The large stroke range of the BDS magnetic core drilling machines, in conjunction with the quick-change chuck, facilitates fast and efficient working without having to repeat the aligning and centring when changing the tool. The

quick-change drill chuck can be universally used for the quick-change inserts with and without safety friction clutch.

Thread cutting systems

For magnetic core drilling machines of the ProfiPLUS class.

Drilling, countersinking and thread cutting with a magnetic core drilling machine from BDS. Quickly, easily and with high precision.

Option 1: Quick-change inserts with safety friction clutch

Threads from M 6 to M 42 – BDS inserts with safety friction clutch allow for precise threading of through-hole threads and blind-hole threads.

The safety friction clutch prevents tap fracture by contacting the bottom of the borehole.

Option 2: Standard quick-change inserts

Threads from M 6 to M 30 – BDS inserts are suited for taking up of taps for through-hole threads.

Which Machine? Which thread?

Assignment of machines of the ProfiPLUS class and the possible thread diameter to the size of the basic quick-change drill chucks and inserts.

Carry cases and adapters

Carry cases for magnetic core drilling machines and EKF edge processing machines.
Adapters for drill chuck and gear rim drill chuck.

Carry cases for magnetic core drilling machines

The new carry cases developed by BDS for magnetic core drilling machines have many benefits.

- Portable – low weight with high level of stability at the same time.
- Closed firmly – secure and large mechanical locks.
- Sealed – the contents are protected completely against dust and spray water.
- Roll along instead of carry – ABS wheels and telescopic grip.

BDS Maschinen develops products from the ergonomic points of view.

The new carry case provided with wheels for magnetic core drilling machines of the MAB 1300 series has large, robust ABS wheels and a telescopic grip, which facilitate transporting the heavy machine to a large extent and make it safe.

The MAB 1300 is fitted safely and securely in robust plastic bowls that absorb the heavy weight of the machine ideally.

HARD PROTECTIVE CASE

ORD. NO. SUITABLE FOR

ZHK 100 MAB 100, MAB 150

ZHK 400 MAB 455, MAB 485, MAB 525

Application: Carry case for BDS magnetic core drilling machines. **Design:** Robust hard cover case with handle and stable clasps. With foam padding, no contents.

CARRY CASE

ORD. NO. SUITABLE FOR

ZPK 001 EKF 300, EKF 450, EKF 452

Application: Carry case for EKF 300, EKF 450 and EKF 452.

Design: Plastic case with handle and foam padding, no contents.

CARRY CASE ON WHEELS

ORD. NO. SUITABLE FOR

ZHK 1300 MAB 1300

Application: Carry case on wheels for BDS magnetic core drilling machines. **Design:** Robust carry case on wheels with handle and stable clasps. No contents.

CARRY CASE ON WHEELS

ORD. NO. SUITABLE FOR

ZHK 825 MAB 825, MAB 845

Application: Carry case on wheels for BDS magnetic core drilling machines. **Design:** Robust carry case on wheels with handle and stable clasps. No contents.

BDS hard cover cases and carry cases on wheels are robust, watertight and shockproof.

The robust carry case on wheels.

1. Connect adapter to drill chuck.

2. Place drill chuck in direct arbor.

3. Ready for use with twist drill.

For magnetic core drilling machines with direct arbor

Clamping devices for tubes from 80 mm to 500 mm diameter

The BDS clamping devices are suitable for tubes with a diameter from 80 to 250 mm and 150 to 500 mm. Flexible and quick clamping is possible in any drilling situation. The clamping device with swivelling V-blocks is fixed on the tube by means of tension chains. The drilling position on the tube can be adjusted easily and safely. The range of application of the magnetic core drilling machines of the ProfiPLUS series is significantly increased by these devices.

Clamping devices

For magnetic core drilling machines of the ProfiPLUS and ProfiSTART class. For tube processing and drilling of non-ferrous metals and stainless steel.

Vacuum clamping device for non-ferrous metals

Magnetic core drilling machines from the ProfiPLUS class can in their entirety also be used for the processing of non-ferrous metals and stainless steel. For that purpose, BDS offers clamping devices, which are provided with a pump with circular oil lubrication to build up a vacuum to ensure a safe connection between the magnetic core drilling machine and the workpiece.

Furthermore, BDS offers customized devices, which exactly meet your requirements and instructions. Just contact us!

VACUUM PLATE FOR SMOOTH SURFACES

ORDER NO.

ZAV 400

Application: For smooth surfaces.

Design: High-performance vacuum pump with circular oil lubrication. Clamping plate with two suction areas and internal drilling area.

Size: 440 x 260 mm, long hole: 50 x 120 mm

Application: Suitable for channelled and gusset plates.

Design: High-performance vacuum pump with circular oil lubrication. Clamping plate ø 300 mm.

Pillars and clamping devices

Magnetic pillars for your own twist drilling machine, MobilCLAMP and drill stands.

Build your own magnetic drilling machine! BDS provides new options for the subject of clamping mechanisms for working with commercially available manual drilling machines and for magnetic core drilling machines.

Magnetic pillar

Industrial pillar

MobilCLAMP – mobile working with magnetic core drilling machines

Magnetic pillars for hand drills

Using this practical magnetic drilling stand, you can convert your manual drilling machine into a magnetic drilling machine.

The magnetic drilling stand is suitable for commercially available manual drilling machines with 43 mm collar diameter.

Thus, the powerful magnet facilitates working horizontally and doing overhead work safely. (For these applications, a safety chain must be used additionally.) The carriage has a working stroke of 180 mm.

Industrial pillar for twist drilling machines

Industrial drilling stand for commercially available manual drilling machines with 43 mm collar diameter.

Safe, secure and stable by a cast base plate and carriage with a working stroke of 180 mm.

Optionally with a drilling machine vice, 100 mm jaw width. Screws for T-grooves are also available for securing.

MobilCLAMP for BDS magnetic core drilling machines

Using the portable clamping mechanism, MobilCLAMP, you can supplement the application options of a magnetic core drilling machine onsite and in the workshop. The magnetic core drilling machine is placed on the desired surface for this purpose

and switched on. Components can be clamped securely in the quick-action clamping vice and you have a flexible table-top drilling machine in no time.

Optionally available: stable frame for MobilCLAMP clamping device.

MAGNETIC PILLARS

Magnetic clamping device, the versatile mounting aid.

High-performance cutting oil **BDS 5000**

Cooling lubricant **BDS 6000**

Recommended for High Speed Steel Core Drills. Pure vegetable oil that is not a hazardous good in the context of import-export regulations. The base materials used are not described in the catalogue of water endangering substances. BDS 5000 do not have to be specifically labelled.

- ▶ Organic basis material with additives
- ▶ Water hazard class 1
- ▶ Bio-degradable, optimal base adjustment of the viscosity for the use of BDS core drills, and easy use for subsequent galvanising

Recommended for Carbide (TCT) Core Drills. For high demands based on synthetic raw materials.

- ▶ Soluble with water, biostable and mild smelling
- ▶ Improves the core drill service life
- ▶ Toxicologically harmless, water hazard class 1

CUTTING OIL

ORDER NO.	NAME	CONTENT
ZHS 005	BDS 5000 cutting oil	5 Liter Can
ZHS 006	BDS 5000 cutting oil	1 Liter Can

COOLING LUBRICANT

ORDER NO.	NAME	CONTENT
ZHB 001	BDS 6000 Cooling lubricant	1 Liter Can

Cutting oil, lubrication spray, lubrication paste and cooling lubricant

High-performance, which can be applied effectively and is environmentally friendly.

The best working result - for the nature!!

High-performance lubricants and cleaning spray by BDS are aligned perfectly to the respective application. The highly efficient composition allows economical and environmentally friendly use.

Particularly recommended in outdoor application: BDS high-performance cutting oil or high-performance soluble cooling lubricant. These products are bio-degradable without leaving any residues and toxicologically harmless. However, at the same time, they are highly effective in the desired lubricating and cooling performance. In addition, the BDS 6000 soluble can be mixed with water in the ratio 1:10 and is thus, high-yield.

High-performance lubrication spray **BDS 5200**

Suitable for working under special conditions (overhead and vertical surface) and also for high-alloy materials.

Foam-like spray with very high adhesive force.

Advantages: Exact dosage of the lubrication spray and thus, optimal lubrication directly on the drill cutters. No drop formation and spraying around, and thus, maximum occupational safety on ladders and work platforms.

- ▶ White adhesive lubricant containing PTFE with corrosion protection
- ▶ Free from PCB, PCT, FCKW and chlorine
- ▶ Active ingredient: Lithium base grease on mineral basis with additives and solvent
- ▶ Propellant: Propane/Butane, to be specified

Caution: Do not use liquid lubricants when working overhead or on vertical surfaces. In such a case, oil might get into the motor causing short-circuit. Please, use BDS High-performance lubrication spray BDS 5200.

High-performance-Cutting paste **BDS 5500**

Optimally suitable for material types that are difficult to machine such as high-alloy steels, Hardox, stainless and heat-resistant steels. Suitable for use overhead and for work in constrained spaces. Ideal for tapping or thread cutting tools.

Step 1: Prior to drilling, spray the high-performance lubrication spray directly into the drill.

Step 2: During drilling, spray the high-performance lubrication spray onto the tip of the drill and into the cut hole.

CUTTING PASTE

ORDER NO.	NAME	CONTENT

Fully Ground High Speed Steel (HSS) Core Drills

HSS-Co 8 Series

- High thermal resistance
- Better wear protection
- High proportion of cobalt at 8 %
- Suitable for higher levels of stress in fine-grained steel and stainless material
- With 19 mm or 32 mm Weldon shank
- Regrindable

HSS-VarioPLUS Series

- High-strength fully ground core drills
- Hard coating in the range of 2.5 µ
- Longer life
- More uniform removal of chips, particularly with long drills – an important aspect for occupational safety

HSS-Standard Series

- Tools with three different cutting depths: 30 mm, 55 mm and 110 mm
- Core drill diameters from 12 mm to 130 mm
- Regrindable

HSS-Co8 Series Core drills made of special steel with a high percentage of cobalt for greater heat resistance and wear protection.		HSS-VarioPLUS Series Fully ground core drills made of high-speed steel, carbide coated, high wear protection, very good chip flow.		HSS-Standard Series Fully ground core drills made of high-speed steel.

Professional Quality Tungsten Carbide Tip (TCT) Core Drills

BDS core drills are manufactured on state of the art CNC-controlled grinding centres. This guarantees consistent grinding, quality and cutting performance for all BDS drilling tools in the entire product spectrum.

Extensive programme range

BDS core drilling tools are produced in five cutting depths of 30, 35, 55, 75 and 110 mm and with more than 94 different drill diameters.

Tool holders

BDS core drilling tools are available with various tool holders. They fit in the KEYLESS quick change drill chuck system as well as in the industrial arbors MK 2, MK 3 and MK 4 with automatic or manual internal lubrication, which are available in our range of accessories.

Carbide Series and Carbide-PLUS Series (TCT)

- Carbide-tipped (TCT) core drills
- Cutting depths of 30 mm, 55 mm, 75 mm and 110 mm
- Diameters from 12 mm to 150 mm
- Carbide PLUS with additional wear resistant carbide coating of up to 2.5 µ

Tool holders:

- ① 19 mm Weldon shank (3/4")
- ② 32 mm Weldon shank (1 1/4")
- ③ 18 mm Quick-In shank

Carbide Series

Carbide-tipped (TCT) core drills. For the processing of stainless steel and non-ferrous metals, we recommend using the high-performance water soluble cooling lubricant BDS 6000.

Carbide-PLUS Series

Carbide-tipped (TCT) core drills with carbide coating.

Carbide-RAIL Series

Carbide-tipped (TCT) core drills for rail core drilling machines.

Quick-In Series

HSS-Co 8-F/Carbide

Core drills made of HSS tool steel or carbide tipped. Suitable for Quick-in tool holder systems.

BDS Maschinen in specialised trade.

You can also find magnetic core drilling machines, accessories and core drills by BDS Maschinen in all good specialised tool stores. Our committed on-site sales partners are happy to advise you and work closely with BDS Maschinen experts to offer you the right tool for your job.

The BDS network – always available

See our performance for yourself.

Customers and users can always contact BDS Maschinen: with personalised advice from competent experts, a fast parts replacement service and detailed product information on magnetic core drilling technology and edge processing. Take us at our word.

Personalised advice

BDS experts in our sales department are available all over Germany to present our products and demonstrate them on-site. Questions about magnetic core drilling technology or edge processing?

For personalised expert advice, contact our centre in Mönchengladbach. You will be put through to the relevant administrator or we will call you back. We look forward to your call! Telephone: +49 (0)2161-3546 -0

Newsletter

You can automatically receive constant information from BDS Maschinen on new products and interesting reports and practical solutions by registering on our homepage.

Express-Service
